EDUCATION

Vellore Institute of Technology, Amaravati

2022 - 2026

B.Tech in Computer Science and Engineering

CGPA: 8.84

EXPERIENCE

Web Developer(Open Source) - GirlScript Summer of Code

Jul 2026 - Oct 2026

GirlScript Foundation (Remote)

- Spearheaded feature development across open-source repositories by architecting production-ready features, establishing Git workflows, and PR standards for 10+ contributors, ensuring technical excellence.
- Functioned as core contributor by identifying and resolving reliability issues, implementing application enhancements, and delivering developer tooling improvements through rigorous code reviews.

FullStack Intern - Infosys SpringBoard Internship

Jul 2026 - Sep 2026

Infosys SpringBoard (Remote)

- Architected a comprehensive full-stack Lab Resource Utilization Platform leveraging React.js, Spring Boot, PostgreSQL, and Spring Security with JWT/OAuth2, implementing RBAC to serve 500+ concurrent users.
- Designed event-driven backend architecture with real-time equipment tracking, automated scheduling, and intelligent waitlist management using JPA/Hibernate and Docker, reducing booking turnaround by 40%.

PROJECTS

Codetrack - Online Coding Platform

[Live App] [GitHub Link]

ReactJS, ExpressJS, PostgreSQL, Docker, Github Actions, AWS

- Conceptualized and executed a full-stack online coding platform supporting 10+ languages with secure sandboxed execution, AI doubt-solving engine, and submission tracking.
- Engineered a horizontally scalable execution architecture leveraging Docker sandboxes; implemented CI/CD pipelines with automated testing and deployment workflows reducing deployment time by 60%+.

Scoliotect - AI-based Cobb Angle Measurement Tool

[Live App] [Github Link]

Python, React, FastAPI, PyTorch

- Conceptualized and deployed an AI-driven scoliosis severity assessment tool utilizing custom YOLO-v8 trained on 1,400+ annotated spine images, automating Cobb angle measurement with 92% diagnostic accuracy.
- Engineered a geometric analysis pipeline for Cobb angle estimation, deployed via FastAPI backend with real-time inference optimization, enabling clinicians instantaneous diagnostic insights.

Jrello - Real-Time Task Management Platform

[GitHub Link]

NextJS, TypeScript, MongoDB, Docker, Github Actions

- Architected a Kanban system with real-time collaborative workflows, issue tracking, and Git-integrated synchronization, achieving real-time board operations through reactive MongoDB schemas.
- Optimized backend infrastructure to sustain 100+ concurrent WebSocket connections with sub-100ms event propagation, implementing connection pooling and optimistic updates for enterprise-grade performance.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

Web Technologies: ReactJS, NextJS, NodeJS, Express, FastAPI

Databases: PostgreSQL, SQLite, MongoDB, Redis

Tools & DevOps: Linux, AWS, Docker, Git, Github Actions

Soft Skills: Communication, Leadership, Team Collaboration, Event Management

CERTIFICATIONS

MongoDB Associate Database Administrator, MongoDB

Jul 2025

AWS Certified Solutions Architect – Associate, Amazon Web Services

Jun 2025

ACHIEVEMENTS & LEADERSHIP

- **Top 10 Finalist**, Infosys SpringBoard — Developed and presented a software project, selected among the top 10 teams from 10+ participating teams. Aug 2026
- **Top 100 Contributor**, GSSOC — Ranked among the top 100 open-source contributors out of 43,000+ participants, contributing to software development projects. Jul 2026
